

# TRAM

**Body support:** The TRAM features an innovative support system that secures the client with a single buckle. This simplicity enables the caregiver to quickly prepare the client for a safe transfer.

**Built-in up/down switch:** Raise and lower the TRAM using the single button built into the right steering handle.

**Color-coded clips :** Caregivers can quickly hook the metal rings onto one of the TRAM's four clips. The clips have been color-coded for identification in protocols for individual clients.

**Telescoping lift column:** The TRAM can be raised high enough to support a 193 cm walking client and then retract down to 110 cm for compact storage.

**Leg expander:** Compact and low-profile, the TRAM passes through a 71 cm doorway. Transfer clients in and out of wider wheelchairs by rotating the leg expander.

**Low-base TRAM** Smaller casters and a low frame profile give the low-base TRAM a clearance of 10.5 cm, making it perfect for rolling into tight spaces such as beneath hospital beds.

DESIGNED FOR USE WITH THE  
**MOVE**<sup>®</sup>  
PROGRAM

## Optional Accessories

Arm Platforms

Forearm Supports

Directional Locks

Thigh Straps

Hip Positioner

Pelvic Support
