

# Tricycle

**Choice of handlebar:** The foam-padded loop handlebar is adjustable in height and positions at any angle. Straight handlebars adjust in height and have standard handgrips.

**Parking brake grips** both back wheels and keeps the trike firmly in place.

**Sturdy wheels** have puncture-proof BMX-type tires. The direct drive and low gear ratio make forward and backward pedaling easier and safer.

**Comfortable and safe:** Both small and large seats are made with comfort and safety in mind.

**Easy access.** Open access combined with a low transfer step make it easy to get on and off the trike.

**A place for your gear:** There's a tote box at the back of your trike for storage or for transporting items.

**Self-leveling pedals** are forward of the seat for comfortable reach and efficient pedaling. Pedal straps come standard on all trikes.
