

# Compass Chair

**It's the perfect inclusion chair.** The rock-solid frame is built to withstand years of demanding use. The contoured seat and sturdy armrests provide reassuring boundaries, giving mildly involved students the support they need to feel secure and comfortable. At the same time, its simple and elegant construction lets it blend easily into any classroom environment. It looks almost like a regular classroom chair – it's designed to.

The five available sizes accommodate everyone from small children to adults, and the adjustable legs allow fine-tuning for optimal positioning.

*"We* have had trouble getting one of our students to sit even for a few moments, which, of course, makes learning very difficult. We've tried different seating options but nothing seemed to work. Imagine our surprise when he saw the Compass Chair for the first time and, entirely on his own, went and sat in it until we had to ask him to get up! *"*

# Compass Chair features

## Unique built-in support

The contoured sides of the seat, together with the inside surfaces of the armrests, provide subtle lateral support that can be particularly helpful for students with autism spectrum disorder, giving security and sensory boundaries.

The Compass Chair comes in five sizes.

## New! Adjustable legs

Choose between long and short legs, each with five centimeters of height adjustment. Both chairs in this picture are size 3.

Stability feet attach to the front and back legs to accommodate more active, tip-prone students.

# Components

## **New! Legs**

Choose between tall and short legs. Tall legs are 5 cm longer than short legs, and both sizes have five centimeters of height adjustment.

## **New! Stability feet**

Choose between tall and short stability legs. The stability feet enlarge the chair's base of support to accommodate more active, tip-prone students. They are adjustable like the standard chair legs.

## **Seat belt**

The optional seat belt clips into the seat when needed for safety or postural support.

## **Pelvic harness**

An alternative to a typical seat belt, Rifton's unique pelvic harness secures a student's hips and upper thighs without pressure on the abdomen. The pelvic harness provides a secure, comfortable base for correct posture.

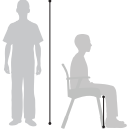

## **New! Low friction feet**

The low friction feet are made of hard plastic and slip on over the standard rubber feet to allow the chair to slide easier.

# Compass Chair dimensions

User dimensions (cm)	R310 size 1	R320 size 2	R330 size 3	R340 size 4	R350 size 5
Height	91–109	109–122	122–140	140–160	160+
Knee to heel	23–28	27–32	32–37	37–42	42–47
Min–max thigh circumference for pelvic harness	27–60	30–72	37–77	38–88	44–98
 <p><b>Key user dimension: height / knee to heel</b> The user's overall height and measurement from knee to heel is a general guide to help you select the appropriate chair. Choose the model that allows for growth.</p> <p><b>Important:</b> Make sure that seat width, depth and height are adequate for each user, and that the user's weight does not exceed the maximum working load.</p>
